
A Level Mathematical Studies - Core Maths

Core Mathematics is a brand new course for those who want to keep up their valuable mathematical skills but are not planning to take AS or A level mathematics. Core Maths has been designed to maintain and develop real life maths skills.

Level Level 3

Specific course entry requirements

College entry to include a grade 5 or above in mathematics at GCSE.

What will I study?

What you study is not purely theoretical or abstract; it can be applied on a day-to-day basis in work, study or life and most courses will include a financial maths element. It will also help with other A level subjects – in particular with science, Geography, Business Studies, Psychology and Economics.

How will I be assessed?

The qualification is assessed by final examination and some courses also offer the option of submitting a portfolio of coursework.

Where will this course lead me?

At the end of the two-year course, you will come out with a level 3 qualification – similar to an AS.

The skills developed in the study of mathematics are increasingly important in the workplace and in higher education; studying Core Mathematics will help you keep up these essential skills. Most students who study maths after GCSE improve their career choices and increase their earning potential.
