
A Level Mathematical Studies – Core Maths

Core Mathematics is a brand new course for those who want to keep up their valuable mathematical skills but are not planning to take AS or A level mathematics. Core Maths has been designed to maintain and develop real life maths skills.

A Level Mathematical Studies – Core Maths

Level Level 3

Specific course entry requirements

College entry to include GCSE Mathematics minimum grade 4 (please refer to the Entry Requirements section page 30 for further details).

What will I study?

What you study is not purely theoretical or abstract; it can be applied on a day-to-day basis in work, study or life and most courses will include a financial maths element. It will also help with other A level subjects – in particular with science, Geography, Business Studies, Psychology and Economics.

How will I be assessed?

100% examination

Where will this course lead me?

At the end of the one-year course, you will come out with a level 3 qualification which carries UCAS points equivalent to an AS level.

The skills developed in the study of mathematics are increasingly important in the workplace and in higher education; studying Core Mathematics will help you keep up these essential skills. Most students who study maths after GCSE improve their career choices and increase their earning potential.

We are very proud of the regional and national awards we have received and feel they showcase what makes our students successful.
