

What's going on in ...

A-Level Spanish

In Spanish Y12 students are practising their speaking skills presenting their findings about a famous Hispanic person in the target language in front of the whole class. They have also been involved in language workshops and are being encouraged to watch films on particular themes of the curriculum.

In the Future Linguists Elective, students are independently studying languages including German, Welsh, Korean, French and Spanish! Year 12 student Jamie has recently completed work experience at his former high school and all students have created CVs to show off their language skills. We've also been exploring which careers benefit from foreign language skills - the conclusion? All! Past SJR linguists have gone on to study Medicine, Teaching, Physics, Geography, Marketing, Engineering, Software Engineering, Psychology...and many, many languages (of course!)

Year 13 are currently finalising their Individual Research Projects, which they will need to present orally in their A-Level Exam. This is an opportunity for students to explore their own interests in the Hispanic World and to develop essential skills which the universities are demanding.
